Hints for the Best performance of your Chiayo P.A. System

For Best performance please follow these instruction:

- Do not use any microphone directly in front of the portable P.A. speaker or at high levels anywhere nearby portable P.A. system as this will result in a "Feedback Loop"
- Consider the correct placement of your portable P.A.system to maximise coverage & minimise any potential of a Feedback Loop.
- In order to keep focus & attention on a person speaking, do not place portable P.A. too far away from the presenter.

Hints to maximise the life of your built in Portable P.A. Rechargeable Batteries

To maximise the life of the built in, rechargeable batteries in Chiayo portable P.A. systems please follow these instructions:

- Charge Unit for 10 hours before first use
- After P.A. has been used for a period of time under battery power (usually between 4-6 hours) it may shut down as the batteries become flat. Do not reset on/off switch as this may cause damage to batteries. Recharge the unit for 10 hours as soon as possible
- Do not store P.A. system with discharged batteries for any extended period of time (eg. Over the school holidays etc.)
- The P.A. system may be recharged after any short usage; batteries do not need to be completely flat before recharging & they do not suffer from any "memory" effect
- To prolong battery life, switch the Chiayo Portable P.A. off when not in use
- We do not recommend leaving your portable P.A. on charge more than 24 hours

iTALK ULTRA PORTABLE VOICE REINFORCEMENT SYSTEM

\$145 + GST
ITEM # iTALK

Portable Voice Saver... & more!

Extremely flexible & portable Voice saver. The clever ergonomic contoured design allows it to be either worn on the belt or over the shoulder comfortably.

High efficiency class-D Digital amplifier extends battery life

iTalk delivers clarity & intelligibility to your message. It's an ideal choice for many applications including classroom, market demonstration, meeting rooms, tour guides & much more.

iTalk also comes fitted with a line level 3.5 mm jack input for connecting your MP3 music player or small devices should any music or playback tracks be required!

Featuring a built in recharging circuit for the 4 x AA batteries (supplied) & separate controls for tone & volume, the unit also comes supplied with a lightweight headworn microphone & charging adapter to save your voice.

Specifications

Maximum Output Power	15 watts max
Speaker	3.5" full range
Power Source	4 x AA Batteries (1.2V)
Rechargeable Batteries	4 x NiMH, 2400 m Ah minimum (included)
Charging Time	8-10 hours
